

PREFERRED CHOICE – Pet Stop Technology™

There's no reason to skimp on protection.

Why wouldn't you use the brand of carpet cushion that offers the most protection for your family and carpet? Only Leggett & Platt offers Dual Protection – two distinct protective features.

Pet Stop Technology™: Includes a moisture-resistant barrier that repels spills in addition to the Fresh Dimension® antimicrobial, which inhibits the growth of mold, mildew, and odor-causing bacteria.

Moisture-resistant barrier

Spills in a home are inevitable, and they can do damage that won't immediately be visible. With Leggett & Platt's moisture-resistant barrier, a special protective barrier on the top side of the pad, spills come up cleanly and easily. This barrier makes spills manageable, keeping carpet looking new, longer.

Fresh Dimension®

Offering a new level of protection for your home, Leggett & Platt's Fresh Dimension® antimicrobial protects against mold, mildew, and odor-causing bacteria. As an EPA-registered antimicrobial treatment, Fresh Dimension is safe and effective, providing protection throughout the entire cushion.
