

ACS[®] SERIES – TRIPLE PROTECTION

There's no reason to skimp on protection.

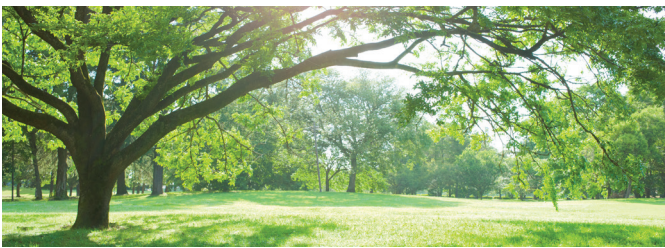

Use the carpet cushion that best protects your carpet. Only Leggett & Platt offers Triple Protection – three distinct protective features in each ACS[®]-series carpet cushion. Carpet today needs to be protected from more than just moisture, and Leggett & Platt's Triple Protection offers security from a host of threats to your healthy home.

Rubber XD[®] and DuraPlush[®] all feature Block-Out[®] and Fresh Dimension[®] protection. Additionally, each cushion offers its own exclusive, third protective layer.

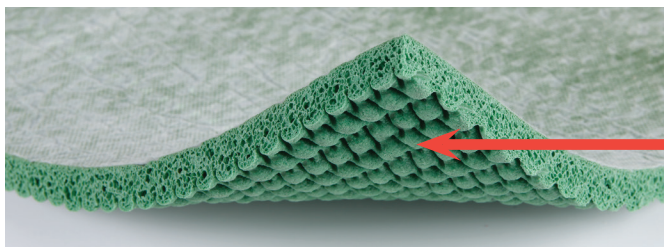

Block-Out

Spills in a home are inevitable, and they can do damage that won't immediately be visible. But with Leggett & Platt's Block-Out, a special protective barrier on the top side of the pad, spills come up cleanly and easily. Block-Out makes spills manageable, keeping carpet looking new, longer.

Fresh Dimension[®]

Offering a new level of protection for your home, Leggett & Platt's Fresh Dimension antimicrobial protects against mold, mildew, and odor-causing bacteria. As an EPA-registered antimicrobial treatment, Fresh Dimension is safe and effective, providing protection throughout the entire cushion – not just applied topically.

Thermo-reinforced bottom moisture and dust barrier

As Rubber XD is being manufactured, a heat treatment creates a seal in the bottom layer, making it moisture- and dust-resistant.

Bottom moisture barrier

Features a barrier on the bottom side of the pad to resist upward migration of moisture.
